Since September of 2009, this highly respected and well-read mass email has been providing valuable technical information and career development opportunities for the worldwide bioprocessing industry. Techno-Blast provides access to the latest technological advancements and “best-practices” for biological product development and production. **This is not another “news” letter.**

Content is derived from timely articles, presentations, essays, techniques, protocols, editorials, reviewer comments, product tutorials, virtual tours, application data, and pretty much any other form of online material that is needed to develop and produce safe and effective products. Links take you to expanded content and additional information on products/services mentioned.

Each Techno-Blast is crafted by our skilled staff of editors, copywriters, graphic designers, and HTML experts. In-house, we utilize the latest industry-standard software applications, and then we send the finished product using a highly reputable and secure email server. Techno-Blast is published by BioProcessing Journal.

Circulation: Techno-Blast goes out to our over 13,000 “opt in” readers every two weeks. One week after publication, we send our advertisers contact information for those readers who clicked on their ads. Techno-Blast has an average open rate of 11% and an average click rate of 9.6%.

Please test your ad file in Internet Explorer, Firefox, Google Chrome, Safari, etc. prior to submission to assure functionality.

IMPORTANT NOTE: Animated GIFs are happily accepted. But please keep in mind that Microsoft Outlook email client (2007 and beyond) displays the first frame only. Please make sure that the first frame of your ad file is comprehensive.

Place 10 or more ads in a calendar year to earn a quantity discount of 20%.
